

Checklist of things to do before nurses leave the room.

Before leaving the room, have you thought about preventing falls?

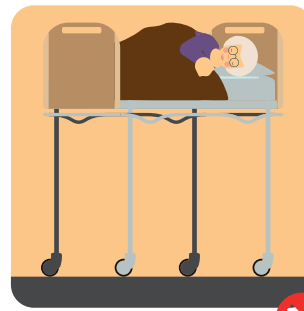

Suggest that the elderly person goes to the toilet

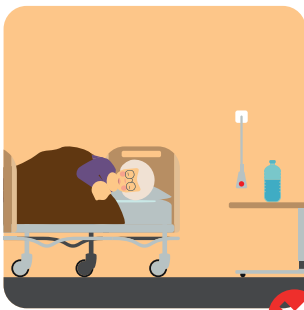

Check that he or she is wearing a pair of good slippers.

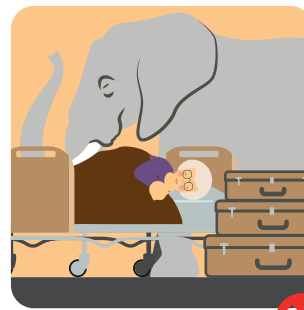

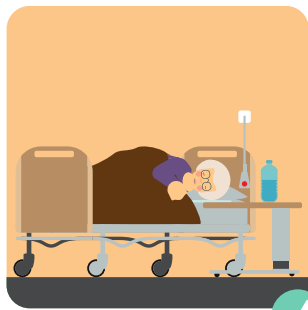

Check that the wheels on the bed are locked.

Check that the bed is in the low position.

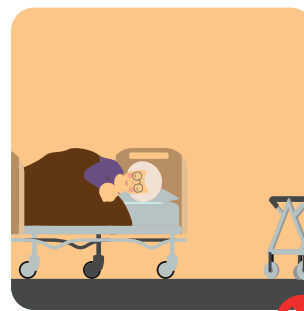

Ensure that the patient can easily reach the bedside table and the bed alarm.

Remove anything which is not required for the patient's care or well-being from the room.

Position the infusion stand on the side of the bed where the patient gets out.

Install walking aids correctly.
